Natural wet slides in Bridger Range, 4/26-4/28

BRIDGER RANGE
Bridger Range
4/28/2021
Code
WL-N
Latitude
45.85120
Longitude
-110.94800
Notes

From obs: "I traversed the Bridger range yesterday (4/28/21). The alpine start was good and solid but I saw lots of recent avalanches that looked super wet, some that had broken a couple feet deep. Conditions were pretty stable until about 1300 when that most recent snow layer started to really want to slide on the crust. Once I was in the meadows between Baldy and the M, at about 1400, I started hearing/feeling really wet "whumps".
