Climax Path, Natural Avalanche

Woody Ridge
Cooke City
2/20/2023
Code
SS-N-R2-D2-I
Elevation
9900
Aspect
E
Latitude
44.97390
Longitude
-109.92400
Notes

From email, "At 12:45 p.m. I saw Climax run naturally. SS-N-R2-D2-I. The low visibility and distance made it hard to tell how deep the crown was, but based on there not being much volume of debris and it not running very far I'm guessing it was within the new snow/storm interface and didn't step down to any buried PWL."

Number of slides
1
Number caught
0
Number buried
0
Avalanche Type
Soft slab avalanche
Trigger
Natural trigger
R size
2
D size
2
Bed Surface
I - Interface between new and old snow
Problem Type
New Snow
