Natural Avalanche on Arden Pk.

Date
Thu, 12/19/2024 - 10:40
Activity
Skiing

Observed from Flanders this morning. Presumed recent natural slide around ~9950 ft. on a E/NE aspect. Hard to tell from a distance, but cornice interference and/or wind loading are possible culprits. Poor image quality, but there may be more debris piles along the ridgeline to the south.

Region
Northern Gallatin
Location (from list)
Maid of the Mist
Observer Name
E. Webb
