Precipitation: NO
Wind: SW

HS:105 Layer Notes:
50-49cm: Problematic layer

Notes: Localized wind effect, and drifts that were pencil hard and were sensitive to the weight of a skier, in areas along the NE ridge (from the ridge to the left of the Fin). These areas did not appear to be widespread. One natural avalanche observed on an upper elevation east/NE aspect near the top of the ridge, left of the Fin. The avalanche appeared to have started from a cornice fall.
