

Skier triggered slide in Twin Falls Basin

Hyalite - main fork

Northern Gallatin

3/26/2020

Code

SS-ASu-R2-D2

Elevation

9000

Aspect

N

Latitude

45.41740

Longitude

-110.98900

Notes

From obs: Small D2 avalanche triggered while assessing the slope on a due-north facing [aspect](#) on a roughly 35-40 deg. slope at ~9000 ft. near Arden Lake in the Twin Falls drainage off the Main Fork of Hyalite. Had about a 2 ft deep, 30 ft-long crown. The [bed surface](#) was not clearly a sun-crust and was of low quality and remained relatively soft to ski on after the [slide](#). There were crystals above that may be classified as facets, maybe 1mm dia. It seemed to have gone on a compacted layer that the 18" of fresh had weighted."
