

Wet slide debris in Beehive and Dudley

Beehive Basin
Northern Madison
4/10/2020
Code
WL-N-R3-D2.5
Elevation
9200
Aspect
SE
Latitude
45.34070
Longitude
-111.39100
Notes

From obs (4/12/20): "Noticed this [slide](#) yesterday evening on the way out of Beehive Basin, on the southeast facing [aspect](#). It appeared to have come all the way down from the upper portion of the ridge on steeper slopes. We figured it slid sometime Thursday or Friday in the high temps. There were several other debris paths, but this was the biggest by far."

From obs (4/18/20): "This [slide](#) appeared to have happened a few days prior to when we observed it on the 16th. When we skied the skiable terrain at Dudley Creek the snowpack was stable, though snow coverage was thin."

Number of slides
