

Woody Ridge

Date

Sun, 11/22/2020 - 20:13

Activity

Skiing

Woody Ridge Mountain Resort was still delivering the goods today despite a few days without snow. Variable HS- over 200 cm on heavily loaded features and plenty of rocks and shrubbery still exposed in scoured areas. 140 cm where we dug, ECTX, no signs of instability throughout the day. There was a thin crust forming on solar aspects by the end of the day.

Region

Cooke City

Observer Name

Henry Coppolillo
