

Beehive

Date

Sat, 01/30/2021 - 16:00

Skied various lines in Beehive/Middle today. Kept slope angles under 35. 20 cm new snow, skied deeper at times. Moderate wind transport at ridge lines above 9k. Sometime mid-day the steep rocky terrain above the going home couloir as well as the start zones in Tyler's avalanched, just new snow, SS-N-D1R2-I. Just guessing about the trigger but didn't see tracks going in, although there were certainly lots of people around. The sun had some heat to it around 1300, seems probable they reload round then.
