

Crosscut parking lot review

Date

Sun, 11/21/2021 - 15:45

Waiting for my kid at biathlon, and using nice hunting binoculars, I am seeing zero natural avalanches in the northern Bridgers.

It does look like there is some lateral snow transport, N or S component to the wind. From binoculars, 2 miles away., take with grain of salt.

Alex Dunn, are you getting these? You should, to potentially incorporate to your pages.

Region

Bridger Range

Observer Name

Jim Earl
