

Flander bowl north glades

Date

Thu, 12/30/2021 - 12:40

Activity

Skiing

Dug a pit at about 9700'. We got an ectp 26 @ 43cm down from the surface. Appears to be on a freeze crust.

Winds were gusty. We assumed up to 35mph. Most slopes has blown snow but wind slabs were scattered. Snow was dense.

45.43700, -110.94254 (location of pit)

Region

Northern Gallatin

Location (from list)

Flanders Creek

Observer Name

Christian
