Cornice collapse, many wet slides in Hyalite

Maid of the Mist Northern Gallatin 3/23/2022 Code WL Latitude 45.41640 Longitude -110.97000

Notes

Solar input triggered small <u>cornice</u> <u>collapse</u> while booting up fat maid that ran by our group, but did not <u>trigger</u> anything from its impact on the slope. We saw many wet avalanches both small and large, mostly loose, but one <u>slab</u> that came down the south east face of Bole after skiing the pinner.
