## **Rider triggered slide on Buck road cut**

Buck Ridge Northern Madison 1/27/2023 Code SS-AM-R2-D1-I Elevation 8000 Aspect E Latitude 45.17190 Longitude -111.38000 Notes

We rode through 1st, 2nd, and 3rd Yellowmule. Measured 13" of new snow with 0.6" SWE in 1st Yellowmule at 10 am. This brought the two day snow total to approximately 20". Snowed all day with varying intensity and there were strong west winds along the ridge.

Visibility wasn't great, but we saw most of the avalanche terrain in the Yellowmules. ..... saw a very small snowmobile triggered avalanche on a roadcut on the way out (6-12 inches deep, ~20 ft wide) that broke on facets in the thin snowpack.
