

Bridger ridge wind

Date

Sun, 12/24/2023 - 00:20

Good morning! Not a snow observation but weather, I'm thinking that the anemometer on the ridge is rimed up and frozen given the numbers over the last 12 hours or so. Someone will have to climb up and free it this morning if it doesn't break loose by itself.

Region

Bridger Range

Location (from list)

Bridger Bowl

Observer Name

Pat Hinz
