

Skier triggered avalanche mt blackmore

Date

Fri, 01/19/2024 - 09:00

Activity

Skiing

Observed the avalanche breaking pretty far down the ridge, but I had a feeling it broke a little bigger judging by how fast the powder cloud was the moving. Went back up there today and saw that it had in fact, broke quite a bit bigger than the 8 inches and 50 feet I initially reported. Photo attached.

Region

Northern Gallatin

Location (from list)

Mt Blackmore
