

Another big avalanche, on Sheep Mtn.

Date

Sat, 03/09/2024 - 13:00

Activity

Snowmobiling

We rode to Round Lake and around the north and west side of Sheep, and back out through Round Lake. There was a big avalanche on the northeast side of Sheep that was previously not reported. It was there this morning so maybe happened yesterday. 6-8'+ deep, 500' wide R4-D3-O.

This morning we saw previous avalanches on Henderson Mtn. in better light and got a photo of one on the lower Henderson Bench. Showing wide [propagation](#) through thick trees.

Temps were warm under clear skies with calm wind. Snow surface was getting moist in the afternoon on sunny slopes.

Region

Cooke City

Location (from list)

Sheep Mountain

Observer Name

Alex Marienthal
