

Ernest Miller Ridge

Date

Mon, 04/01/2024 - 06:25

Activity

Skiing

Saw no signs of instability. Skied east to southeast aspect slopes. The snow did get moist, but not sloppy, in the afternoon. Did not execute any snow pits and accompanying test. The snow pack felt solid. Would have been nice to do a little snow science, but it was a long tour.

Region

Southern Madison

Location (from list)

Ernie Miller Ridge

Observer Name

David Combs
